不銹鋼之應用

| Applications of Stainless Steel |

不銹鋼因具備良好的耐蝕性與機械性質，呈現的加工產品美觀且多變化，廣泛的應用在各項工業(如：化學、機械、車輛...)、建築業、家庭用品等領域。不銹鋼不僅提升了產品的價值，也豐富了你我的生活。

Because of excellent anti-corrosion and mechanical properties, various magnificent stainless steel products are widely applied on industrial sector (e.g. chemistry, machinery, automobile, etc.), construction industry, household appliances and so forth. Stainless steel not only increases the value of the products but also enriches our life.

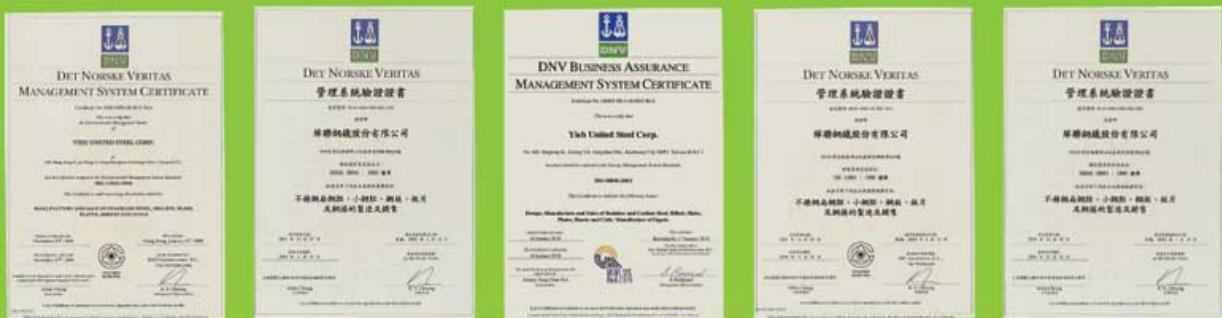

環境保護

| Environment Protection |

燁聯本著「地球是我們的家」之理念，在建廠規劃初期，即投資購買各式最新防治污染設備，並成立環保專責單位，積極建立各項環境監測系統及強化檢測技術。更與日本大同特殊鋼公司技術合作，移轉國內第一套資源回收製程，回收煉鋼集塵灰和氧化鐵等生產廢棄物，將其中有價金屬鎳、鉻、鐵再製成原料來使用；另建置二座冷軋硝、氟廢酸再生設備，將廢酸再生後送回產線重複使用，使資源充分利用。燁聯亦積極協助回收處理同業之集塵灰與廢酸，成效卓著，不但減少產業廢棄物處理成本、提升產業競爭力，同時降低廢氣、廢水、廢棄物之排放及能源的浪費，達到廢棄物資源循環零廢棄之目標。

Bearing in mind that "The earth is our only home", YUSCO, at its establishing stage, invested on the purchase of advanced pollution preventative equipment and set up an environmental protection department prompting in build up environmental control and monitoring systems, and also in strengthen the testing technologies. Furthermore, via technical cooperation with Daido Steel Corporation from Japan, we shifted the first line of the recycling process in Taiwan to collect the dust from smelting process and the ferric oxide from rolling process. We then refined from the waste hose valuable metal like the Nickel, Chromium, and Iron, and to recycle them as raw materials. Besides, we also implemented two sets of advanced re-production facilities for Cold rolling waste nitrofluoric acid. Acid sludge could then being recycled for production which completed the cycle of reuse resources. In the mean time, we aggressively collect to recycle the dust and acid sludge from the industry. We made great achievements on reducing the cost of handling industrial waste, improve the competitiveness of the industry via reducing the industrial emission and the waste of resources. We subjected to accomplish the completed reuse of the industrial waste with no waste remains.
